

June 2026

Dear Parent/Guardian:

In an effort to observe the evolving standards in mathematics in New York, our math department will be incorporating instructions in the use of graphing calculators into its curriculum. Please read below to determine which calculator your child needs for the upcoming school year, based on which course they will be enrolled in.

ALGEBRA REGENTS

The graphing calculator will be required for all students enrolled in ***Algebra Regents*** (including accelerated 8th graders). In September 2026 the math department will continue to work with a specific calculator. We are requiring students to have the **Texas Instruments TI-Nspire CX II Graphing Calculator** (See reverse side of this letter for picture). Please note that this is NOT the CAS version. It is important that your son/daughter have this specific calculator as the Algebra Regents teacher will be using this calculator in class, and any different or older model does not have the same capabilities as these.

ALGEBRA A

For all students enrolled in ***Algebra A***, the math department is *recommending* students have a **Texas Instruments TI-Nspire CX II Graphing Calculator** (See reverse side of this letter for picture).

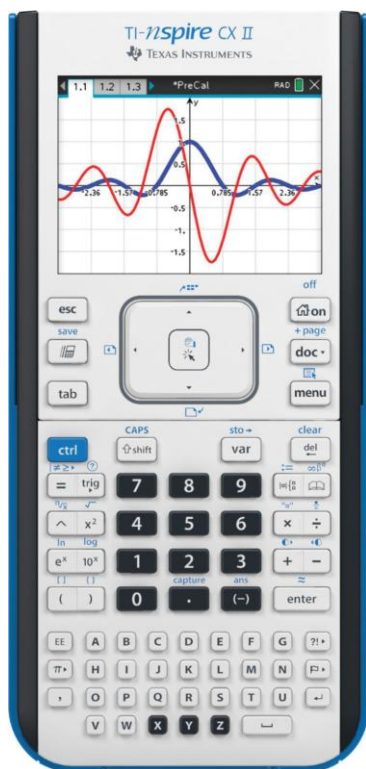

We encourage your child to bring their unopened calculator with them on the first day of school. This way, their teacher can check to make sure the calculator they have is the correct version.

Please feel free to contact me with any questions or concerns.

Sincerely,
Mr. Melfi
Math Department Chair
